
Securitzaci3 del WordPress

Description

He aplicat diferents mesures de seguretat al meu WordPress per protegir la p3gina web i evitar accessos no autoritzats i la p3rdua d'informaci3. Tamb3 he tingut en compte la import3ncia de mantenir WordPress i els seus components actualitzats i de disposar de c3pies de seguretat.

He comprovat que WordPress, el tema i els plugins estiguin actualitzats. Tamb3 he utilitzat una contrasenya segura per protegir l'acces a l'administraci3. A m3s, he configurat UpdraftPlus i he fet una c3pia de seguretat de la web, guardant-la a Google Drive. Finalment, he comprovat que la p3gina web continua funcionant correctament.

Help

Two Factor (2FA) Authentication via Email

We have not detected a plugin installed that will handle your emails via SMTP. Please note, if you enable our plugin for a user you must make sure that your WordPress website sends emails correctly, otherwise the user will be locked out until email sending works on your website.

Site Title

Gigi Benidze

Tagline

In a few words, explain what this site is about. Example: "Just another WordPress site."

Site Icon

Choose a Site Icon

The Site Icon is what you see in browser tabs, bookmark bars, and within the WordPress mobile apps. It should be square and at least 512 by 512 pixels.

WordPress Address (URL)

http://gbenidze.inscastellbisbal.net

Site Address (URL)

http://gbenidze.inscastellbisbal.net

Enter the same address here unless you [want your site home page to be different from your WordPress installation directory](#).

Administration Email Address

gigi.benidze@inscastellbisbal.net

This address is used for admin purposes. If you change this, an email will be sent to your new address to confirm it. **The new address will not become active until confirmed.**

Login url

https://gbenidze.inscastellbisbal.net/ login

Protect your website by changing the login URL and preventing access to the wp-login.php page and the wp-admin directory to non-connected people.

Redirection url

https://gbenidze.inscastellbisbal.net/ 404

Redirect URL when someone tries to access the wp-login.php page and the wp-admin directory while not logged in.

Lockout ?

allowed retries ?

minutes lockout ?

lockouts increase lockout time to hours ?

hours until retries are reset ?

After a specific IP address fails to log in **4** times, a lockout lasting **20** minutes is activated. If additional failed attempts occur within **24** hours and lead to another lockout, once their combined total hits **4**, the **20** minutes duration is extended to **24** hours. The lockout will be lifted once **24** hours have passed since the last lockout incident.

Trusted IP Origins ?

Specify the origins you trust in order of priority, separated by commas. We strongly recommend that you **do not** use anything other than REMOTE_ADDR since other origins can be easily faked. Examples: HTTP_X_FORWARDED_FOR, HTTP_CF_CONNECTING_IP, HTTP_X_SUCURI_CLIENTIP

Why Use Our Premium Cloud App?

 Absorb site load caused by attacks

 Use intelligent IP denial/unblocking technology

 Sync the allow/deny/pass lists between multiple domains

 Get premium support
